EXPERIENCE

Software Engineer | **Sulopa Technologies Pvt Ltd** | Bangalore, India July 2023 – Dec 2023

- Software Engineer with expertise in developing applications
- Specialized in designing and implementing a cargo shipment application
- Proficient in utilizing **ERPNext** for software development
- Demonstrated ability to analyze requirements and deliver efficient solutions
- Skilled in **coding, testing, debugging**, and maintaining software applications
- Collaborated with cross-functional teams to ensure project success
- Proficient in Git and **GitHub**: Demonstrated ability to effectively utilize version control systems, including Git and GitHub, for collaborative software development projects.
- Active GitHub Contributor: Successfully pushed and maintained code repositories on GitHub, showcasing a commitment to organized version control and collaboration within a team environment.

Frontend Developer Intern | **Sharpener Tech** | Bangalore, India June 2022 – June 2023

- Front End Developer with expertise in E-commerce website development, incorporating **Context API** for efficient data management
- Successfully implemented **React Router** for seamless page navigation in **E-commerce and Gmail Clone** projects
- Applied **Firebase API** for secure user authentication across **E-commerce, Gmail Clone, and Expense Tracker applications**
- Enhanced Expense Tracker with advanced features, including **Firebase API for email verification** and **password reset, dark mode theme** for premium users, and **download functionality** for expenses in Excel or CSV format. Utilized Bootstrap for CSS styling.

PROJECTS

YouTube Clone | *REACT.JS, BOOTSTRAP*

- Developed YouTube clone with real-time data, fostering an immersive video streaming experience.
- Implemented nested comments and live chat using API polling, enhancing user engagement and interactivity.
- Engineered an optimized search bar with live API integration, debouncing, and caching, improving search responsiveness.
- Demonstrated problem-solving skills in addressing challenges related to real-time data synchronization and user interaction, collaborating effectively with a diverse development team.

Disney Clone | *CLONE OF OTT PLATFORM USING REACT.JS, TAILWINDCSS*

- Developed a Disney clone, showcasing front-end skills by utilizing Tailwind CSS for a sleek and responsive user interface.

- Deployed the project seamlessly on Vercel, ensuring high availability and performance for users accessing the Disney clone.
- Implemented API calling to fetch and display dynamic content, providing users with an interactive and up-to-date experience.
- Demonstrated proficiency in front-end development by combining design skills with technical execution to create a visually appealing and functional Disney clone.

Food Villa | *FOOD ORDERING APPLICATION USING REACT.JS, TAILWINDCSS*

- Developed a food ordering app with a config-driven UI, providing flexibility and customization options for a seamless user experience.
- Utilized Parcel bundler for efficient asset management, ensuring optimal performance and streamlined development workflows.
- Implemented shimmer loading effects, enhancing user experience by providing visual feedback during content loading.
- Integrated live API updates, allowing real-time access to menu information, prices, and availability for an up-to-date and accurate user experience.
